

Affordable hosting plans to suit your needs.

You don't have to add IT staff or equipment when you want to use the power of the web to promote the image and professionalism of your business. With CMS hosting you can get that professional look and feel of having your own in-house e-mail or web server without the costs or hassles. CMS hosting services provide an ideal solution that delivers the combination of control, reliability, and affordability you need.

Hosting innovation.

Our innovative hosting solutions deliver stability and performance — as well as the proven security of the FreeBSD 6 UNIX operating system.

- Virtual power – With VPS, your hardware is shared, but your software is dedicated. So you get full access, flexible control over your applications, and consistent performance.
- Expert management – The CMS team of Internet experts takes care of your VPS, managing the hardware, core software applications, and connectivity so you can remain focused on your business.
- Upgrade path – A tiered line of hosting solutions are offered at numerous price points to give you a smooth upgrade path and unlimited scalability.

Full-featured simple hosting solutions.

Dedicated Control Panel

CMS hosting plans include a user friendly control panel that allows you to easily manage your web site and e-mail accounts.

Web Mail

Cms hosting plans include web mail access through any web browser.

Security and Redundancy

CMS hosting servers are intel based triple redundant that are backed up on at least a daily basis. Data centers are geographically 1000s of miles apart so they are not affected by natural disasters.

Threat Protection

CMS servers include anti-virus and spam filtering software for basic protection against external threats.

World-Class Connectivity

When you power your applications with our VPS solution, you get the peace of mind that comes with knowing your Website and applications are running in state-of-the-art data centers with ultra-fast Web connections through a global Tier-1 network. Servers are monitored 24x7x365. With this type of infrastructure you can rest assured that your applications will stay up and running

Virtual Private Servers. Real Applications.

Our hosting solutions provide the resources you need to:

- Host an e-commerce Website
- Support a corporate intranet
- Build a custom development environment
- Run Web-based calendaring
- Run multimedia applications (video streaming)
- Function as an email or chat server
- Create a customer support tracking system
- Host multiple Websites (subhosting)
